

I Am

The times I placed behind me
The places oh so dear
I try to place myself to be
Next to you with no fear

You ask me why I've come so far
Looking back, I do not know
I turn to see a shining star
Around you such a glow

You sit before me asking
"Who do you think you are"?
I stand upright unmasking
And think this quite bizarre

The wolf you see before you
Is with me every day
This wolf has always been so true
What ever they may say

I am the wolf my spirit talks
To touch so many souls
We work together never balk
And share each other's roles

The wolf, he tells me how to act
I guide, I teach, I heal
I am the wolf; I've signed my pact
You'll feel I am so real
