

## The Night and Wolves

We walk within a time to know, a place that we might be  
As wolves together we must show, for this we must agree  
This place of comfort, never known, to seize our love within  
Our strength together we have shown, forever it has been  
The knowledge of the pack so old, the night has been our friend  
The Night and Wolves, a bond so bold, this pack as it will send  
Their feelings for the ones so close, this bond within the pack  
As evening comes and we must know, the night can be so black  
To guard us as we make our way, to find the one so loved  
And shroud our union from the ones, just you and I beloved  
Against the canvas of the night, I share my love with you  
Your willing actions send to flight, this heart that feels so new  
My mate forever in my soul, the night has peeled away  
That place of comfort was our goal, and never shall we stray
