

## Zig Zag's Lament

I looked to gaze upon a form I used to call so dear  
Our conversations, memories now are with me never fear  
The smile you send as if a gift is felt within my heart  
To curve across your muzzle it is such a work of art  
Your graceful movements hypnotize the ones so close around  
Yet I have fallen deep within your spell it's so profound  
We've tried to keep a distance so there might not be a clash  
As those who ask you for your time so often only dash  
To others notwithstanding as you give your all to them  
Your heart so big you share with all and never do condemn  
To watch the sun reflect against your fur of white and black  
Allows a hope of comfort shared and lessens all attack  
We'll hold each other warmly now knowing that as friends  
Zig Zag dear, you and I need never make amends
